DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following invention is required under 35 U.S.C 121:
 - A. Claims 1-6, and 18-22 are drawn to a method and system for connecting to Internet Service Provider via networking circuitry, classified in **class 709, subclass 227**.
 - B. Claims 7-13 are drawn to a virtual point of presence (POP), classified in **class 709, subclass 245**.
 - C. Claims 14-17 are drawn to a payment processing method, classified in **class 705, subclass 1**.
2. Inventions A, B, and C are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention A has separate utility such as a method and system for connecting to Internet Service Provider via networking circuitry, classified in a *different Class/Subclass*. Invention B has separate utility such as a virtual point of presence (POP), classified in a *different Class/Subclass*. Invention C has separate utility such as a payment processing method, classified in a *different Class/Subclass*. See MPEP 806.05(d).
3. The inventions are distinct, each from the other because of the following reasons:
 - (a) these inventions have acquired a separate status in the art as shown by their difference classifications.

Art Unit: 2143

(b) the search required for each Group is different and not co-extensive for examination purposes.

For example, the searches for the two inventions would not be the co-extensive because these Groups would require different searches on PTO's classification class and subclass as following:

The Group A search (claims 1-6, and 18-22) would require use of search **class 709**, **subclass 227** (not required for the inventions B and C).

The Group B search (claims 7-13) would require use of search **class 709**, **subclass 245** (not required for the inventions A and C).

The Group C search (claims 14-17) would require use of search **class 705**, **subclass 1** (not required for the inventions A and B).

For the reasons above restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17 (h).
